PROBLEM 2 - F2: $\tan(x)$

SOEN 6011 - Summer 2021

Software Engineering Processes

Repository address : <https://github.com/Dakatsu/SOEN6011Calculator>

Rokeya Begum Keya

40183615

Assumption:

The user will give integer(Degree) value of x in $\tan(x)$ function. The value of $\tan(x)$ function will be calculated in radian.

Requirements:

[1][2]

The current section describes the requirements to implement the function $\tan(x)$.

Requirement Id : F2-R1

Overview	$x = 0^\circ$ in to the $\tan(x)$ function
Version	1.0
Description	If the user gives an input $x = 0^\circ$ for $\tan(x)$ the function may return 0 as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_tanZeroCheck_1

Requirement Id : F2-R2

Overview	$x = (\text{Positive Degree})$ in to the $\tan(x)$ function.
Version	1.0
Description	If the user gives $x = \text{any positive degree}$ for $\tan(x)$ the function may return the approximate value of $\tan(\text{positive degree})$ as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_tanFortyCheck_2

Requirement Id : F2-R3

Overview	$x = 90^\circ$ in to the $\tan(x)$ function
Version	1.0
Description	If the user gives an input $x = 90^\circ$ for $\tan(x)$ the function may return "undefined" as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_tanNinetyCheck_3

Requirement Id : F2-R4

Overview	$x = (\text{Negative or Positive Degree})$ in to the $\tan(x)$ function
Description	If the user gives $x = \text{any Negative or Positive degree}$ for which $\tan(x)$ value is Negative the function may return the approximate negative value of $\tan(\text{Negative or Positive Degree})$ as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_tanNegativeValueCheck_4

Requirement Id : F2-R5

Overview	$x = (\text{Negative Degree})$ in to the $\tan(x)$ function
Version	1.0
Description	If the user gives $x = \text{any Negative degree}$ for $\tan(x)$ the function may return the approximate value of $\tan(\text{Negative degree})$ as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_tanNegativeNumberCheck_5

Requirement Id : F2-R6

Overview	$x = 180^\circ$ in to the $\tan(x)$ function
Version	1.0
Description	If the user gives an input $x = 180^\circ$ for $\tan(x)$ the function may return 0 as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_tanOneHundredAndEightyCheck_6

Requirement Id : F2-R7

Overview	$x = 90^\circ$ in to the $\text{Rad}(x)$
Version	1.0
Description	If the user gives an input $x = 90^\circ$ for $\text{Rad}(x)$ the function may return the approximate value in radian as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_getRadCheck_7

Requirement Id : F2-R8

Overview	$x = 180^\circ$ in to the $Rad(x)$
Version	1.0
Description	If the user gives an input $x = 180^\circ$ for $Rad(x)$ the function may return the approximate value (3.14159..) in radian as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_getRadOneHundredAndEightyCheck_8

Requirement Id : F2-R9

Overview	$x = 0^\circ$ in to the $\sin(x)$ function
Version	1.0
Description	If the user gives an input $x = 0^\circ$ for $\sin(x)$ the function may return 0 as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_getSinZeroCheck_9

Requirement Id : F2-R10

Overview	$x = (Positive\ Degree)$ in to the $\sin(x)$ function.
Version	1.0
Description	If the user gives $x = any\ positive\ degree$ for $\sin(x)$ the function may return the approximate value of $\sin(positive\ degree)$ as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_getSinFortyCheck_10

Requirement Id : F2-R11

Overview	$x = 0^\circ$ in to the $\cos(x)$ function
Version	1.0
Description	If the user gives an input $x = 0^\circ$ for $\cos(x)$ the function may return 1 as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_getCosZeroCheck_11

Requirement Id : F2-R12

Overview	$x = (Positive\ Degree)$ in to the $\cos(x)$ function.
Version	1.0
Description	If the user gives $x = any\ positive\ degree$ for $\cos(x)$ the function may return the approximate value of $\cos(positive\ degree)$ as output.
Owner	Rokeya Begum Keya
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F2_getCosFortyCheck_12

Requirement Id : F2-R13

Overview	Availability
Version	1.0
Description	The system may provide the calculation to the user within four seconds.
Owner	Rokeya Begum Keya
Priority	High
Type	Non-Functional
Difficulty	Medium

PROBLEM 2 - F3: Hyperbolic Sine, $\sinh(x)$

SOEN 6011 - Summer 2021

0.1 Function Requirements

Requirements and Assumptions

The current section describes the requirements and assumptions to implement the function $\sinh(x)$.

Explicit Assumptions: For a value to be *accurate*, it shall be correct up to a specific number of decimal places. This value will be based on balancing accuracy with computation speed. Above a certain absolute input value, the function may return $\pm\infty$ due to the exponential nature of the function going beyond the range of a double floating point.

Requirement ID: F3-R1

Overview	Input x into $\sinh(x)$ function.
Version	1
Description	If the $\sinh(x)$ function as given in Problem 1 receives an integer or decimal input x , the system shall return an accurate value.
Owner	Kyle Taylor Lange
Priority	High
Type	Functional
Difficulty	High
Verification Method	

Requirement ID: F3-R2

Overview	Availability
Version	1
Description	The system may provide the calculation in F3-R1 to the user within three seconds.
Owner	Kyle Taylor Lange
Priority	High
Type	Performance
Difficulty	Medium
Verification Method	

PROBLEM 2 - F5

SOEN 6011 - Summer 2021

Software Engineering Processes

Repository address : <https://github.com/Dakatsu/SOEN6011Calculator>

Sijie Min

40152234

Requirements and Assumptions

The user will give value of a, b and x. a, b can be both integer and decimal, x is integer

Requirement Id : F5-R1

Overview	Sets a, b, then input x into $y = ab^x$
Version	1.0
Description	If a is set to 0, the output result is 0. If the x input is 0, the return result is equal to a
Owner	Sijie Min
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F5test

Requirement Id : F5-R2

Overview	Sets a, b, then input x into $y = ab^x$
Version	1.0
Description	x can be entered as a positive number or a negative number.
Owner	Sijie Min
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F5test

Requirement Id : F5-R3

Overview	Availability
Version	1.0
Description	Avoid calculating x times of multiplications, but reduce the number of multiplications to approximately \sqrt{x} times to increase the running speed.
Owner	Sijie Min
Priority	High
Type	Functional
Difficulty	High
Verification Method	F5test

Requirement Id : F5-R4

Overview	Availability
Version	2.0
Description	Ensure the accuracy of decimal operations to the power of decimals
Owner	Sijie Min
Priority	High
Type	Functional
Difficulty	High
Verification Method	F5test

Requirements and Assumptions

[1][2]

The current section describes the requirements and assumptions to implement the function x^y .

Explicit Assumption : The transcendental function x^y will be accurate and accepts input which comprises of rational and irrational numbers.

Requirement Id : F7-R1

Overview	X(0) to the power of Y(0)
Version	1.0
Description	If the user gives an input for X as Zero and input for Y as Zero. The function may return the 1 as output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_1

Requirement Id : F7-R2

Overview	X(0) to the power of Y(Real Number)
Version	1.0
Description	If the user gives an input for X as zero and input for Y as any Real Number. The function may return zero as output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_2

Requirement Id : F7-R3

Overview	X(Positive Number) to the power of Y(0)
Version	1.0
Description	If the user gives an input for X of any positive number and input for Y as Zero.The function may return 1 as the output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_3

Requirement Id : F7-R4

Overview	X(Negative Number) to the power of Y (0)
Version	1.0
Description	If the user gives an input for X of any negative number and input for Y as Zero.The function may return 1 as the output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_4

Requirement Id : F7-R5

Overview	X(Positive Number) to the power of Y(1)
Version	1.0
Description	If the user gives an input for X as any positive number and input for Y as 1. The function may return X as the output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_5

Requirement Id : F7-R6

Overview	X(Positive Number) to the power of Y(Positive Number)
Version	1.0
Description	If the user gives an input for X as any positive number and input for Y as positive number. The function may return positive number as the output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_6

Requirement Id : F7-R7

Overview	X(Negative Number) to the power of Y(Positive Even Number)
Version	1.0
Description	If the user gives an input for X as any Negative number and input for Y as positive Even number. The function may return positive number as the output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_6

Requirement Id : F7-R8

Overview	X(Negative Number) to the power of Y(Positive Odd Number)
Version	1.0
Description	If the user gives an input for X as any negative number and input for Y as positive odd number. The function may return negative number as the output.
Owner	Manimaran Palani
Priority	High
Type	Functional
Difficulty	Medium
Verification Method	F7_TestCase_6

Requirement Id : F7-R9

Overview	Availability
Version	1.0
Description	The system may provide the response with output to the user within finite time.
Owner	Manimaran Palani
Priority	High
Type	Non-Functional
Difficulty	Medium
